(Recognition) <https://github.com/clovaai/deep-text-recognition-benchmark>

Main:

Step 1: Clone this repo

(do it yourself)

Step 2: Install Requirements (idk if this works, I already did it or something)

```
1 !pip3 install torch==1.3.1
2 !pip install torchvision==0.4.2
3 !pip install opencv-python==3.4.2.17
4 !pip install scikit-image==0.14.2
5 !pip install scipy==1.1.0
6 !pip install Pillow==6.1
```

Step 3: put your test image files in testFolder folder

is PC > PhanDinhTuong (E:) > CVProject > CRAFT > CRAFT-pytorch > testFolder

speUC.png

Step 4: Detect text region:

WARNING: From this step, the path may not be correct for different devices, please change it to match yours.

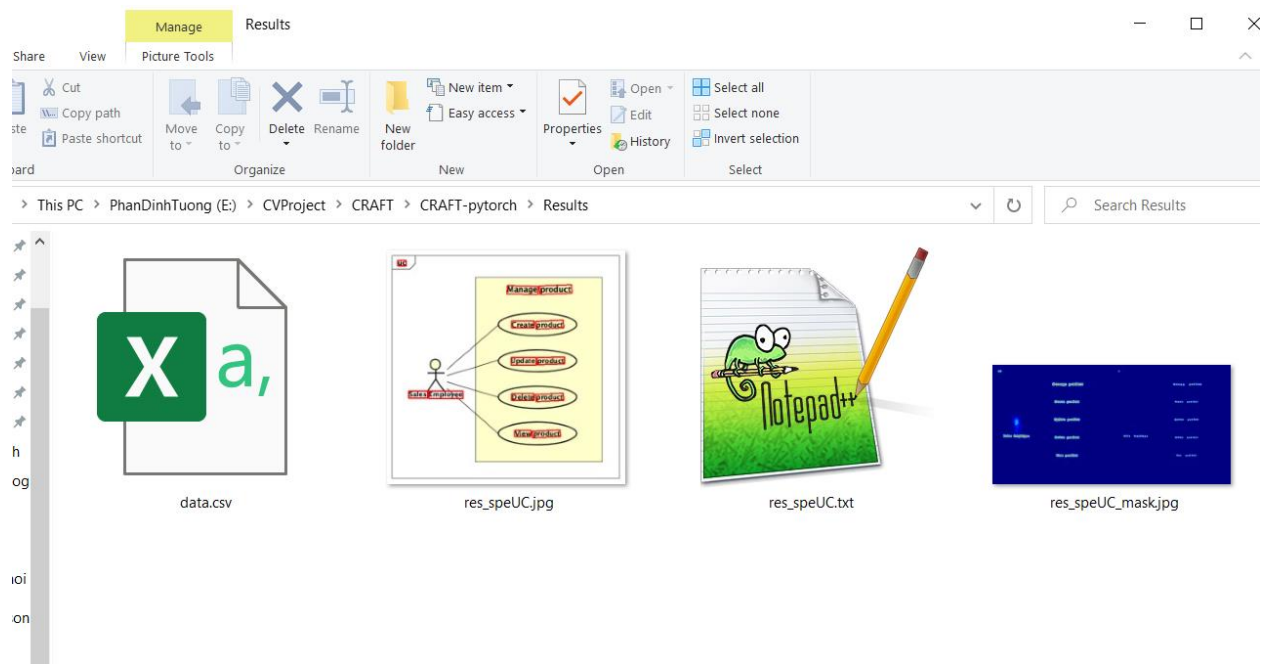

Open terminal and cd to CRAFT-pytorch, run pipeline.py:

```
C:\Windows\System32\cmd.exe

elapsed time : 4.299876928329468s

```

Result:

Step 5: Crop the text region (word actually)
